

## Manage Programs, Lead People

The Ministry Database is a high customizable, easy-to-use solution for church ministry workers, designed by church ministry workers. The Ministry Database lets you store names and addresses, family information, sacramental information and unlimited contact information all in one place. It even lets you track the activities, classes and groups that your church members are involved in. It is a one stop resource for churches with vibrant and active religious education, youth ministry and RCIA programs.

## The Ministry Database helps your keep track of...

- + Member information, birthdates, school, grades phone numbers, emails, IM handles and much more.
- + Family information including parent and guardian information, marital status, mailing and phone preferences and more.
- + Contacts and conversations that you have with members in a secure contact manager...
- + Activities and groups that church members participate in.
- + Sacramental records and significant events for each member.
- + And unlimited pages of information for all your parish programs from religious education, Confirmation, and RCIA to youth ministry.

## What makes the Ministry Database better than the others?

- + One Touch Reports let you easily print class lists, mail labels, photo directories and more for the records that you are looking at in the program.
- + The Quick Search bar lets you type a full or partial name, grade or phone number and instantly see a list of matching results.
- + Groups, classes and activities are easily organized in a visual manner so you can get results back quickly, no tricky codes or remembering keywords.
- + With Easy Navigation Links you can easily jump from a list of names in a group or family to the record of the member simply by double clicking on their name in the list.
- + The program is multi-user ready right out of the box and that means that each staff member in your church can access and share their information. And with the built-in User Security Center you can insure that staff members only see the parts of the data that they are supposed to see.
- + The Ministry Database gives you unlimited ability to add extra fields, organize them on extra tabs, and set up the program to meet not only your needs, but the needs of your whole parish staff.

Experience the joy of accomplishing your goals in the office and having time to minister with the people of your community.

Ministry Database helps you succeed by keeping all the important information you need at your fingertips.
